

MADANRAJ P

Software Engineer | MERN Stack Developer

8072441294 • madanraj0519@gmail.com • linkedin.com/in/madanraj-7b8b23232 • github.com/Madanraj0519

SUMMARY

Software Engineer with 1.6 years of experience building scalable full-stack web applications using React.js, TypeScript, Node.js, Express.js, and MongoDB. Experienced in developing CRM applications and business workflows, with hands-on expertise in REST API development, JWT authentication, external API integration, and database optimization. Strong in building maintainable application architecture and performance-focused frontend and backend solutions.

EDUCATION

B.E., Computer Engineering

Vels Institute of Science, Technology & Advanced Studies
Chennai

May 2023

CGPA: 7.42

Relevant coursework: Data Structures and Algorithms, Database Management, Software Engineering, Web Development

TECHNICAL SKILLS

LANGUAGES: JavaScript (ES6+), TypeScript, HTML5, CSS3, Java

FRONT END: React.js, React Router, Redux Toolkit, Tailwind CSS, Responsive Design.

BACK END: Node.js, Express.js, Spring Boot, REST APIs, JWT.

DATABASE: PostgreSQL, MongoDB.

STATE and API: Redux Toolkit, Context API, Axios, REST API Integration.

TESTING: Jest (Unit Testing), Supertest (Integration Testing).

TOOLS: Git, Docker, Redis, Swagger/OpenAPI, Postman.

CORE CONCEPTS: Layered Architecture, Design Patterns, Data Structures and Algorithms, Authentication and Authorization (JWT, Spring Security), API Performance Optimization, Basic understanding of Microservices Distributed Systems.

PROFESSIONAL EXPERIENCE

Software Engineer (MERN Stack) | Stratsyn.ai Pvt Ltd (Incubated with IT and T), Chennai.

Sep 2024 – Mar 2026

- Developed scalable CRM applications using React.js, TypeScript, Node.js, Express.js, and MongoDB for customer, lead, and contact management workflows.
- Developed and maintained RESTful APIs using Node.js and Express.js, implementing CRUD operations, reusable services, request validation, and centralized error handling.
- Built reusable React components, custom hooks, and API services using Redux Toolkit and Context API.
- Integrated PostgreSQL and MongoDB to support application data retrieval, processing, and business workflows.
- Implemented caching for frequently accessed data and external API responses to reduce redundant data retrieval.
- Implemented JWT-based authentication with access and refresh token flows, protected routes, and authorization handling.
- Applied Controller-Service-Repository architecture and modular coding practices to improve maintainability and scalability.
- Collaborated with team members to integrate APIs, debug issues, and deliver application features.

Front-End Developer Intern | Teenofes, Chennai

Mar 2022 – May 2022

- Developed a responsive web application using React and Tailwind CSS.
- Integrated frontend components with backend REST APIs.
- Worked closely with team members to deliver features on schedule.

PROJECTS

AI-Powered Research Assistant

Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, JWT, React, REST APIs

- Developed a full-stack AI-powered research platform and browser extension using React, TypeScript, and Java Spring Boot.
- Built RESTful APIs for user authentication, research prompts, AI response history, and user operations.
- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Designed PostgreSQL data models and integrated database operations using Spring Data JPA.
- Implemented request validation, exception handling, and standardized API responses using a layered Controller-Service-Repository architecture.
- Integrated AI service APIs and implemented prompt history tracking, daily usage limits, and caching logic.

Expense Tracker [Live Demo] [GitHub]

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Mongoose · JWT · Chart.js · Tailwind CSS

- Developed a full-stack expense tracker for managing income, expenses, categories, budgets, and financial reports.
- Built secure JWT-authenticated REST APIs with validation, filtering, sorting, pagination, and user-scoped transactions.
- Implemented MongoDB transactions to maintain consistency between transaction records and user summary totals.
- Built backend aggregation APIs for monthly reports, dashboard charts, income, expenses, savings, and savings rate.
- Added explainable spending insights, heuristic category suggestions, CSV/PDF exports, automated tests, and GitHub Actions CI.

Gym Administration Platform — Freelance Client Project [Live Demo] [GitHub]

React.js · JavaScript · Tailwind CSS · Responsive UI

- Developed responsive React.js dashboards and authentication interfaces for a paid freelance client project.
- Built reusable admin modules for members, attendance, subscriptions, branding, and membership management.
- Implemented reusable data tables with pagination and responsive layouts for efficient record management.
- Delivered the frontend end-to-end, collaborating with the backend developer for API integration.

CERTIFICATIONS AND LANGUAGES

- JAVA Backend Certification — Softlogic Systems, Chennai (Mar – Jun 2026)
- Full Stack Development — Guvi, Chennai (Jul – Dec 2023)
- LANGUAGES : English (Professional Working Proficiency) · Tamil (Native)
